PERMANENT LIGHTING CATALOG

Lighting with No Boundaries!

What is Permanent Lighting?

Permanent lighting is redefining the lighting industry with its commitment to quality, innovation, and affordability. With complete custom control of every light, permanent lighting empowers users to create stunning light shows or provide gorgeous nighttime architectural lighting, making it the perfect choice for any project.

Permanent lighting is a unique way to illuminate your homes or buildings year round. It allows you to celebrate special occasions by creating custom color pattern you choose. Whether you're celebrating St. Patrick's Day, Independence Day, Christmas, or your sports team winning the big game, you can show your spirit by changing the look of your home with the touch of a button.

INSTALLATION

Permanent lighting is a lighting system designed to be hidden during the day and vibrant at night. The track is mounted underneath the soffit on the front of the fascia of homes or commercial buildings without a soffit. Our tracks are available in many different colors. This means during the day the track will blend right into the color of your project.

FEATURES

Permanent lighting provides you with personalized lighting solutions along with customizable effects and lighting sequences as each light is individually addressable.

BRIGHTNESS

Permanent lighting is brighter and longer lasting than any other lighting solution on the market. With each puck being only .96 watts, it proves to be extremely efficient and cost effective. Want to dim things down? Permanent lighting offers the flexibility to be dimmed from 100% to 1% brightness.

EFFECTS

With permanent lighting, you are provided with personalized lighting solutions along with customizable effects and light sequences. The accompanying app allows for quick creation of any color pattern desired for your project.

DURABILITY

Permanent lighting is manufactured from some of the highest quality materials that have been tested to withstand the test of time. Your system is impervious to the harshest of the sun's rays and the most extreme winter weather conditions, ensuring its durability and reliability year-round.

COLORS

The color palette is infinite providing the ability to easily create endless possibilities. Let your imagination run wild!
The color selector feature grants you the flexibility to choose your desired hue from the palette. It also features over 10 pre-set colors including warm white, pure white and cool white. Within the color selector, you can adjust the white slider to seamlessly transition from 2700k to 5500k, catering to your preferred lighting temperature.

SECURITY LIGHTING

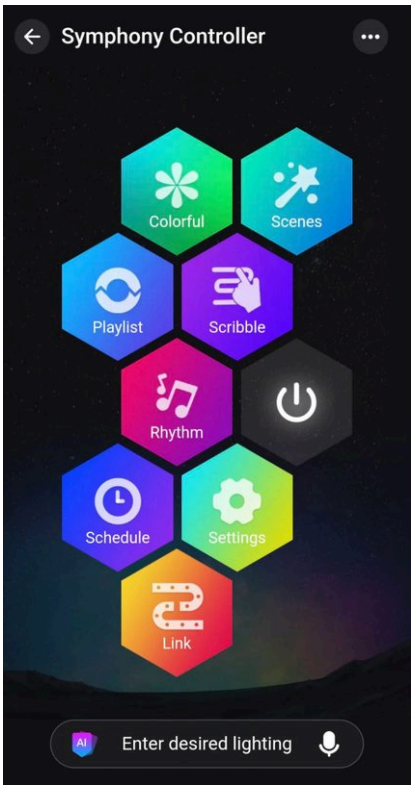
One of the additional benefits of permanent lighting is the sense of security it brings. Many people dislike the glaring floodlight appearance often considering it the only solution to deter unwanted visitors at night. You can rest assured knowing that you'll have full visibility outside your home without the bulky aesthetic of traditional floodlights.

APP CONTROL

AMAZING FEATURES

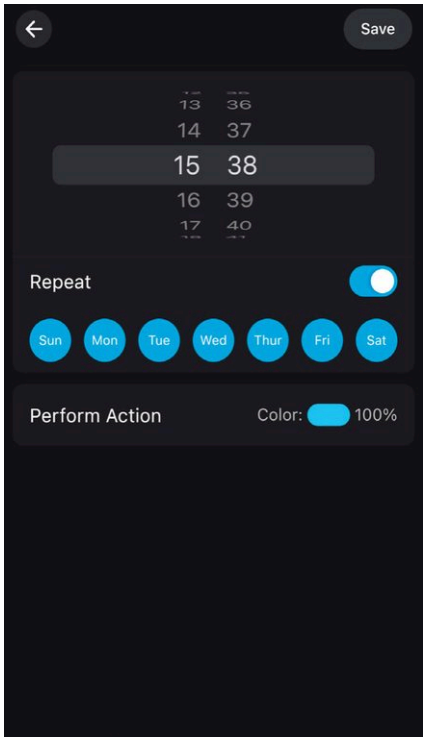
The Surplife app gives you full control of your entire lighting system whether you're at home or away. Select from one of the pre-loaded patterns or create your own. Additionally, Surplife offers the ease of decorating for any special occasion with the touch of only a few buttons.

Learn more about how to use the app



TIMER / CALENDAR

The integrated timer feature enables you to conveniently schedule your lights to turn on and off directly from the app, without the need for any additional hardware.
The calendar function empowers you to schedule your system to transition colors and scenes according to the seasons, with the option to set recurring yearly schedules.



APP PRESETS

Pre-loaded patterns include New Year's, Halloween, Valentine's Day, Thanksgiving, Summer, Fall, and much more.

No matter how you use your new permanent lighting system, you will always have a fascinating result. Bring your home to life with color and enjoy the wonderful experience of having color changing lights all year long!
